

# [ELECTRONIC APPARATUS WITH NON-VOLATILE MEMORY AND WRITING METHOD THEREOF]

## Abstract

An electronic apparatus with non-volatile memory and writing method thereof. For a specific address of a memory block of a non-volatile address memory, it can be written only one time per hour. The writing time limit of the non-volatile memory is significantly lengthened with the writing method in the present invention when writing times to a specific memory block of the non-volatile memory is limited.
